### Print Recommendations

On most solvent-based machines, pre and post heat settings should be higher than when printing on vinyl film or fabric. Set at highest resolution, print mode "best" and media type "textile" or "backlit". For the best results on Roland and other Eco Solvent machines, the use of an external heater is recommended.

### Packaging and Handling

Rolls are put up in cartons on 3 in. suspended cores. Cartons should be stored laying flat. Do not leave standing on end for a prolonged period of time. Wrinkling or telescoping could occur.
