and UV-Curable**

Applications
**Bus Stops, Vending
Machines, Taxi Tops,
Window & Glass Displays,
Trade Shows, P.O.P.
Displays and Posters.**

GMI's Solvent-Print Media Backlit Film is a traditional backlit substrate compatible with Eco-Solvent and Solvent-Based inkjet printers.

It is especially ideal for both photographic and graphic signage applications because of its capacity to replicate colors from a very wide color gamut.

This front print semi-matte backlit film offers maximum color density with vivid and high output resolution for any image.

And, the advanced ink adhesion technology achieves excellent color reproduction and saturation, while a higher percentage of translucency allows the brilliance to shine through.

GMI's Solvent-Print Media Backlit Film is the optimal choice for your specific backlit application needs.
