

Self Adhesive Digital Design

SEAL Self Adhesive Digital Design products give you the flexibility to tackle almost any job. The range features several different types of digitally printable materials and a number of unique adhesives: clear, reverse-print, easy-apply for windows; heavy weight, removable and repositionable for walls; permanent, removable and gray-back for floors and a whole host of other signage and retail applications. Choose the product that's right for your next job – and turn **bland to GRAND!**

UltraClear PET NEW

UltraClear PET is a 4.9 mil optically clear polyester film that can be used for many different graphic and design applications. It has a unique ultra clear silicone adhesive that is both repositionable and removable. This product is great for architectural design, including glass office partitions, POP and retail signage and window graphics. It is designed for use with solvent, eco-solvent, latex and UV printers.

ClearGrip

Now there's an easy way to create and install window graphics, ClearGrip. Powered by the well known gudy window adhesive technology, ClearGrip features a textured adhesive, allowing for bubble free application without any special tools needed. Install your graphics in minutes! Apply MightyGrip or other white backer for additional density and opacity when printing without white ink. Use this 3.2 mil clear removable self adhesive vinyl for POP displays, retail signage and much more.

Easy Dot

Easy Dot is an innovative new product that will save time and money when creating and installing wall, window and trade show graphics. The key to its ease of installation is the special dot patterned adhesive which creates air channels that allow for a bubble and wrinkle free installation. No special tools are needed - not even a squeegee! This 4 mil self adhesive vinyl is available in your choice of a white matte or clear (frosted translucent) finish. Use Easy Dot for trade show panels, POP and retail signage, window graphics, glass office partitions and much more.

ProGrip

For long-term premium performance, trust ProGrip. Available in a matte finish, this 3.4 mil calendered polymeric vinyl features our best outdoor durability rating of 5-7 years. The 98% opacity level eliminates the need to use gray adhesive to block out most applied-surface show through, while the tight dot gain and high white point provide brilliant image quality. It is available with permanent or removable adhesive. Use ProGrip for long term signage applications on vertical, flat and slightly curved surfaces.

MightyGrip

MightyGrip is the economy SAV solution for shorter term applications. This calendered monomeric vinyl is 3.5 mil thick and has an outdoor durability of 3-4 years. MightyGrip is available with your choice of permanent or removable adhesive. Choose either the matte or gloss finish to create vibrant wall graphics and general signage applications for vertical, flat, and slightly curved surfaces. MightyGrip is also available with a gray, permanent adhesive in your choice of gloss or matte. The gray adhesive allows it to be applied over previously imaged surfaces without image show-through.

WallGrip

WallGrip is the go-to product for all your indoor wall graphic projects. Easy to handle and install, WallGrip features a 6 mil polymeric vinyl with a specialty removable adhesive, designed for clean removal without residue or damage to walls. WallGrip's specialty adhesive even works when printed to the edge, or when no border is left upon cutting. Use this product for signage, retail displays, murals and trade show graphics.

Please note: For specific printer and ink compatibility ratings refer to the individual Product Reference Sheets. For Application Instructions and Tips, please refer to the Application Guide.
